

DEMOZONEPROGRAMME

28 APRIL

11:30 - 12:30

Topic "Color Intuition"

Demonstration material: Electrical equipment by Donel

Description: Repeat the combination blindly and join the prize draw! A sequence of switch colors is hidden inside the box. Your task is to recreate it correctly without looking. Test your intuition and win a gift!

12:30 - 13:30

Topic: "Learn to calculate heat loss yourself — quickly, clearly, and without complex theory"

Demonstration material: Tubular radiators Ceontera by CeZar Group and Purmo Delta Laserline by a Finnish concern of European quality

Description: A practical breakdown of heat loss calculation without complicated theory. Participants will learn how to determine heat loss, consider key parameters, and obtain results sufficient for selecting heating equipment. Focus on simplicity, accuracy, and real-world application.

13:30 - 14:30

Topic: "Laminate without mistakes: characteristics, selection errors and a real crash test in operating conditions" by Laminate Center company

Description:

We will break it down systematically:

- which characteristics truly matter and which are just marketing
- how to read indicators: wear class, AC rating, HDF density, moisture resistance, locking systems
- common mistakes made by designers and clients

Live crash test:

- laminate reaction to water and moisture
 - behavior under impact and scratches
 - performance of locking systems under load and dismantling
 - where marketing ends and "premium" begins
-

14:30 - 15:30

Topic: Interactive game — "Wall Panel Mosaic" by Damata company

Demonstration material: bamboo wall panels

Description: Participants need to assemble a word related to renovation and interior design from small fragments of decorative panels.

These can be words about design, materials, or style.

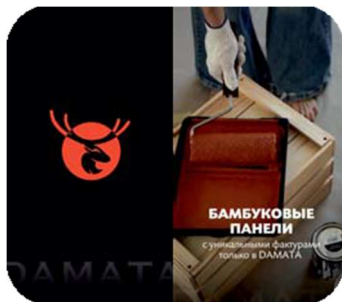

If the word is assembled correctly — the participant receives a small gift from the company.

Ready to try?
