SECTIONS OF THE EXHIBITION

- Automation. Process equipment and services
- Corrosion protection and insulation
- Well drilling and development
- Electrical equipment and services
- Design, factory buildings, construction
- Geophysical research
- Government agencies, trade organizations and professional services
- Safety and environmental protection
- Service companies and services
- Marine equipment and services
- Non-destructive testing equipment
- Non-destructive testing services
- Oil and gas equipment
- Oil and gas transportation
- Oil company (IOC/NOC)
- Oilfield services
- Pipelines - construction, technology, maintenance, and repair
- Exploration and production
- Oil refinery, petrochemical and gas processing plants
- Reservoir engineering
- IT and telecommunications
- Valves and instrumentation

EXHIBITION PROGRAM

As part of the exhibition, sessions and a seminar were held with the participation of 30 speakers — representatives of leading oil and gas companies, industry associations, and practicing experts.

The program included:

- Plenary Session “The Caspian Region as an Industrial Hub: Integration of Oil and Gas Projects, Infrastructure and Petrochemicals”
- Panel Session “Digital Transformation of the Oil and Gas Industry: Strategy, Technologies and Economic Impact”
- Strategic Session “The Role of Special Economic and Industrial Zones in Developing the Petrochemical Cluster and Related Sectors”
- Expert Talks – ProLabSupport on the topic: Agilent Gas Chromatography for the Oil and Gas Industry: Portfolio Overview, Key Applications and Dedicated Analyzers

BENEFITS FOR PARTICIPANTS

For exhibitors, the following were organized:

- 100 B2B meetings with key operators of the oil and gas industry: KPO, NCOC, Kalamkas-Khazar
- Industrial tours to enterprises located in the Special Economic Zone “National Industrial Petrochemical Technopark”: KPI Inc. LLP, Intago Kazakhstan LLP, and Karabatan Utility Solutions LLP

VISITORS

VISITORS' AREAS OF ACTIVITY

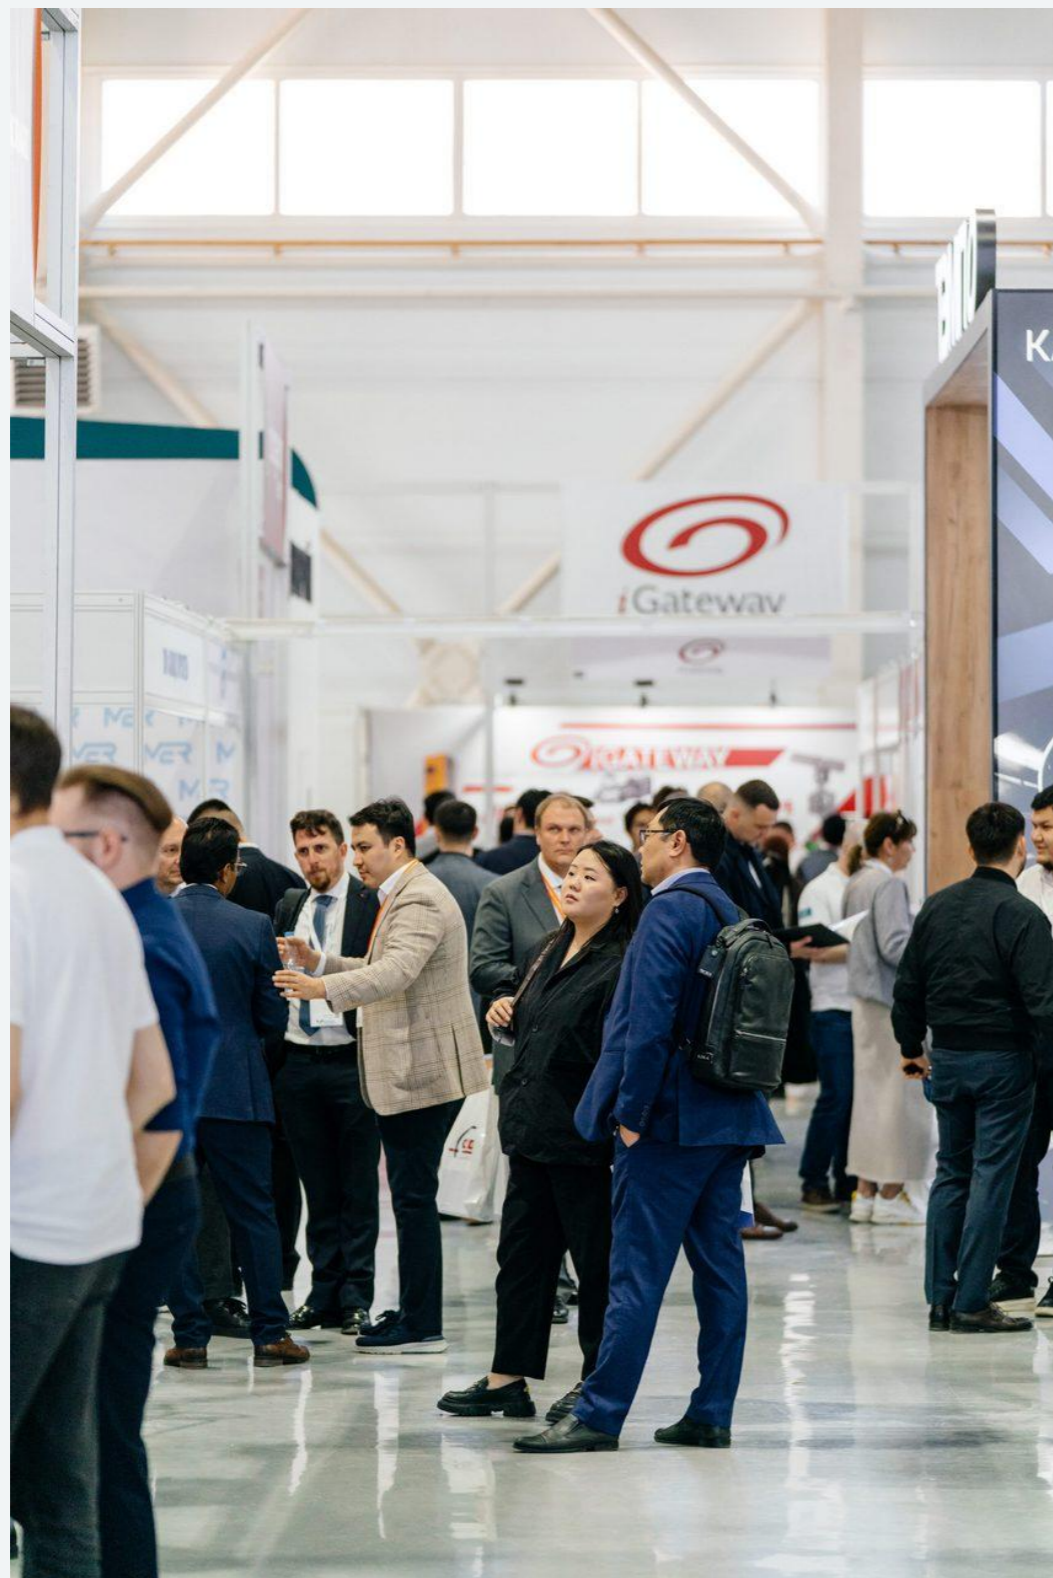

- 16 % Corrosion protection and insulation equipment
- 13 % Engineering, Services, Construction
- 9 % Welding and welding works
- 7 % Oil companies
- 7 % Oil and gas equipment
- 7 % Power and electrical equipment and services
- 6 % Drilling and construction of wells
- 5 % Exploration and Production
- 4 % Science and Education
- 3 % Oil and gas service companies
- 3 % Automation, equipment and services for processing
- 3 % Information technologies. Telecommunications
- 3 % Oil refinery, petrochemical and gas plants
- 2 % Oil and gas transportation
- 2 % Oilfield services companies
- 2% Occupational safety,health. Environmental protection
- 1 % Geology, geophysics of oil and gas fields
- 1% Non-destructive testing services
- 1 % Oil and gas engineering
- 1% Pipelines - construction, technology, maintenance and repair
- 1% Reservoir engineering
- 1% Valves, regulators

VISITORS

LEVEL OF POSITION HELD

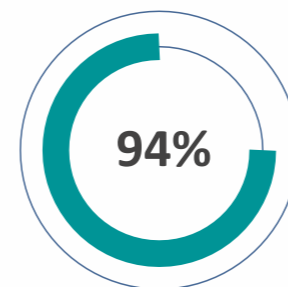

- 21%** Company Director/Owner
- 22%** Deputy Director of the Company
- 21%** Head of Department/Group
- 35%** Manager/Specialist
- 2%** Individual entrepreneur

- 2 % Non-destructive testing equipment
- 2 % Non-destructive testing services
- 2% Marine equipment and services
- 2 % Government agencies, trade organizations and professional services

PARTICIPANTS

REVIEWS FROM PARTICIPANTS

“

This is our first exhibition in the oil and gas sector. Overall, we are satisfied with our participation: the first day was challenging due to the large flow of visitors, but now the work is proceeding steadily, and the organization is at a good level.

Our company is based in Taldykorgan — a local full-cycle manufacturer of energy equipment, including batteries, UPS systems, and related products.

For us, participation means strengthening our position in the Kazakhstan market, establishing new contacts and projects, expanding cooperation with clients, and presenting our capabilities. Initial results are already visible; final conclusions will be drawn later.

Ali Zhunusov
Kainar LLP

”

“

We are based in Aktau. The company specializes in the manufacturing and repair of shut-off valves, as well as the implementation of technologies for servicing oil and gas pipelines. We produce equipment under the Cameron (Schlumberger) product line, including valves and automation systems.

Currently, we are localizing production in Kazakhstan: at the initial stage — the GIT valve, ball valve, and actuator. The level of local content is around 50%.

This is my second exhibition: the event is large-scale and has generated strong interest. Agreements have already been reached, visits are planned, and the first commercial proposal has been received.

Evgeny Gorbushin
SLB

”

“

Laser is a manufacturer of safety valves based in Hamburg. I represent the company in the Caucasus and Central Asia, together with our partner Brugge. We are engaged in equipment selection, preparation of commercial proposals, and technical support of projects. The impressions of the exhibition are very positive: the level of organization is high, and all processes are well-structured. Despite having limited experience in the industry, I can already see the importance of such events. It is an effective platform for meeting key clients (TCO, NCOC, KPO) and developing cooperation.

Artur Isaev
Laser LLP (Germany)
